

Saturday, September 24, 2016

8:30 - 8:45

Welcome Nikolas Ziakas and Gabriela Wirth-Barben

Session 1		Chairpersons: Anthony Vivian and Eugen Boltshauser	
8:45 - 9:10	L1	Joubert syndrome – from a case report to the best studied hindbrain malformation	Eugen Boltshauser <i>Switzerland</i>
9:10 - 9:35	L2	Congenital cranial dysinnervation	Anthony Vivian <i>UK</i>
9:35 - 10:00	L3	A novel, non-invasive test for myasthenia gravis: ocular vestibular-evoked myogenic potentials (oVEMP)	Konrad Weber <i>Switzerland</i>

10:00 - 10:45

Poster exhibition/ znüni

Session 2		Chairpersons: Francis Munier and Christina Gerth-Kahlert	
10:45 - 10:54	FP1	First-line intra-arterial vs intravenous chemotherapy in unilateral sporadic group D retinoblastoma: shorter time to success, better ocular survival and visual outcome with the intra-arterial route	Francis Munier <i>Switzerland</i>
10:54 - 11:03	FP2	Radiation optic neuropathy and retinopathy in the management of retinoblastoma	Català-Mora Jaume <i>Spain</i>
11:03 - 11:12	FP3	Cyst of the pineal gland in retinoblastoma: what link with disease and treatments	Maja Beck Popovic <i>Switzerland</i>
11:12 - 11:21	FP4	Saethre-Chotzen syndrome: Review of ophthalmic manifestations and causes of visual impairment	Kavita Aggarwal <i>UK</i>
11:21 - 11:30	FP5	Blau syndrome associated Uveitis: results from an international prospective cohort study	Inge Sarens <i>Belgium</i>
11:30 - 11:39	FP6	Ocular Morphology and Function in Juvenile Neuronal Ceroid Lipofuscinosis (CLN3) in the first decade of life	Markus Preising <i>Germany</i>
11:40 - 12:05	L4	Novel gene defects of vitamin B12 metabolism	Matthias Baumgartner <i>Switzerland</i>
12:05 - 12:30	L5	Ophthalmologic findings in neurodegenerative disorders	Barbara Plecko <i>Switzerland</i>
12:30 - 12:33	RF1	Long-term visual and electrophysiological follow-up in seven early onset cblC patients	Eliane Delouvrier <i>France</i>
12:33 - 12:36	RF2	Visual function in patients with mitochondrial encephalopathy with lactic acidosis and stroke like episodes (melas) and maternally inherited diabetes and deafness (midd) with mitochondrial a3243g mutation	Martina Jarc Vidmar <i>Slovenia</i>
12:36 - 12:39	RF3	Clinical presentation and surgical management of orbitopalpebral Neurofibromatosis Type 1 in pediatric patients at a tertiary care centre	Mandeep Bajaj <i>India</i>
12:39 - 12:42	RF4	Ophthalmologic Screening of Children with Café-au-lait Macules: A Retrospective Study in a Local Portuguese Pediatric Population	Joana Braga <i>Portugal</i>
12:42 - 12:45	RF5	A review of visual outcomes in childhood craniopharyngioma treated with a hypothalamic sparing, surgical and radiation strategy	Christos Moraitis <i>UK</i>
12:45 - 12:48	RF6	Neurological acute vision loss in children	Pascal Dureau <i>France</i>
12:48 - 12:51	RF7	Medically unexplained visual loss: Incidence, diagnostic workup and outcomes	Annegret Dahlmann-Noor <i>UK</i>
12:51 - 12:53	RF8	Tumors underlying unilateral orbital proptosis in children	Rawan Omary <i>Israel</i>

12:53 - 14:00

Poster exhibition/ lunch

Session 3		Chairpersons: Birgit Lorenz and Nicoline Schalijs-Delfos	
14:00 - 14:25	L6	ROP – a neonatologists point of view	Roland Gerull <i>Switzerland</i>
14:25 - 14:50	L7	Long-term developmental outcome after prematurity	Bea Latal <i>Switzerland</i>
14:50 - 14:59	FP7	Comparison of the Effects on the Retinal Revascularization Process of Ranibizumab and Bevacizumab Applied Intravitreally as Monotherapy in Aggressive Posterior Retinopathy	Yusuf Koçluk <i>Turkey</i>
14:59 - 15:08	FP8	Retinal Oximetry with Scanning Laser Ophthalmoscope in Infants	Wouter Vehmeijer <i>Netherlands</i>
15:08 - 15:17	FP9	Utility of serum IGF-1 levels in predicting ROP appears race specific	Himanshu Patel <i>UK</i>
15:17 - 15:26	FP10	The photoreceptor function is affected by extremely preterm birth	Anna Molnar <i>Sweden</i>
15:26 - 15:35	FP11	RETeval retinal responses in full-term and pre-term children	Manca Tekavcic Pompe <i>Slovenia</i>
15:35 - 15:44	FP12	Motion Perception and Form Discrimination in Extremely Preterm Children	Kerstin Hellgre <i>Sweden</i>

15:45 - 16:15

Poster exhibition/ vieri

Session 4		Chairpersons: Eva Larson and Veit Sturm	
16:15 - 16:18	RF9	Development of the macula in children with retinopathy of prematurity	Liudmila Katargin <i>Russia</i>
16:18 - 16:21	RF10	Fluorescein angiography for aggressive posterior retinopathy of prematurity	Irina Trifanenkova <i>Russia</i>
16:21 - 16:24	RF11	Psychosocial Aspects of Mothers with Preterm Children	Ayse Tulin Berk <i>Turkey</i>
16:24 - 16:27	RF12	Vision screening in children 5 to 8 years old living in Region Västra Götaland, Sweden - a prospective, multicentre study	Emelie Gyllencreutz <i>Sweden</i>
16:27 - 16:30	RF13	The Oculome: a genetic test to diagnose a diverse range of ocular birth anomalies	Vijay Tailor <i>UK</i>
16:30 - 16:33	RF14	Unexpected Genetic Cause in Two Female Siblings With High Myopia And Reduced Visual Acuity	Birgit Lorenz <i>Germany</i>
16:33 - 16:36	RF15	Efficiency of neurotrophic therapy in patients with traumatic optic neuropathy.	Ekaterina Konokotina <i>Russia</i>
16:36 - 16:39	RF16	Functional and morphological outcome analysis of pediatric cataract surgery	Sarah Ambroz <i>Switzerland</i>
16:40 - 17:05	L8	Pediatric Multiple Sclerosis	Jutta Gärtner <i>Germany</i>

17:05 - 17:35

EPOS General Assembly (members only)

19:00 - 23:00

Dinner at the ZOO Zürich, Restaurant Pantanal

Sunday, September 25, 2016

Session 5		Chairpersons: Michael C. Brodsky and Patrick Yu-Wai-Man	
8:30 - 8:55	L9	Inherited optic neuropathies	Patrick Yu-Wai-Man <i>UK</i>
8:55 - 9:20	L10	Neurodiagnostic Malformations of the Optic Disc	Michael C. Brodsky <i>USA</i>
9:20 - 9:29	FP13	Infrared reflectance imaging in children with Neurofibromatosis type 1	Anthony Manassero <i>France</i>
9:29 - 9:38	FP14	Choroidal abnormalities in café-au-lait syndromes: A new differential diagnostic tool	Catherine Cassiman <i>Belgium</i>
9:38 - 9:47	FP15	Value of visual acuity test and OCT in diagnosis of visual pathways glioma in NF1	Joan Prat <i>Spain</i>
9:47 - 9:56	FP16	Ocular findings and handheld optical coherence tomography in microcephaly	Eleni Papageorgiou <i>Greece</i>
9:56 - 10:05	FP17	Optic pathway glioma-associated nystagmus : new insights from a systematic clinical and oculometric case series.	Matthieu Robert <i>France</i>
10:05 - 10:14	FP18	Sectoral analysis of the retinal nerve fibre layer thinning after hemispherotomy	François Audren <i>France</i>

10:15 - 10:45

Poster exhibition/ znüni (coffee break)

Session 6		Chairpersons: Alicia Serra and Chris Lloyd	
10:45 - 11:10	L11	Neurofibromatosis type 2: an update	Klara Landau <i>Switzerland</i>
11:10 - 11:35	L12	Tuberous sclerosis complex - role of the ophthalmic examination	Christina Gerth-Kahlert <i>Switzerland</i>
11:35 - 11:38	RF17	Non-contact ultra-widefield retinal imaging of infants with suspected abusive head trauma	Imran H. Yusuf <i>UK</i>
11:38 - 11:41	RF18	Safety and interest of cocaine drops in infant anisocoria	Gilles Martin <i>France</i>
11:41 - 11:44	RF19	Cocaine test results and systemic findings in children with anisocoria	Fabienne Fierz <i>Switzerland</i>
11:44 - 11:47	RF20	Limbic versus pars plicata approach in pediatric cataract surgery: comparison of complications	Marta Morales <i>Spain</i>
11:47 - 11:50	RF21	Childhood uveitis not associated with juvenile idiopathic arthritis: Results from UK national survey of incidence, aetiology and initial management	Annegret Dahlmann-Noor <i>UK</i>
11:50 - 11:53	RF22	Long-term results after cataract surgery with IOL implantation in uveitis associated with juvenile idiopathic arthritis	Urszula Kulik <i>Sweden</i>
11:53 - 11:56	RF23	Presentation and management of cytomegalovirus retinitis in immunocompromised children	Charlotte Denier <i>France</i>
11:56 - 11:59	RF24	What's the best for young children? Pseudoisochromatic, Mollon-Reffin- Minimalist or Cambridge color vision test?	Oliver A. Pfäffli <i>Switzerland</i>
12:00 - 12:25	L13	Infantile nystagmus	Irene Gottlob <i>UK</i>

12:25 - 13:45

Poster exhibition/ lunch

Session 7		Chairpersons: Sandra Valleina and Nikolas Ziakas	
13:45 - 14:10	L14	Pediatric idiopathic intracranial hypertension	Hana Leiba <i>Israel</i>
14:10 - 14:19	FP19	“Suspected papilledema” in children What is real and what is not?	Irit Knisbacher <i>Israel</i>
14:19 - 14:28	FP20	Ultrasound and OCT in optic nerve head swelling in children: distinguishing true from pseudo-papilloedema	Annegret Dahlmann- Noor <i>UK</i>
14:28 - 14:37	FP21	Pediatric pupillography screening as a tool to detect ocular and neuro-ophthalmological pathology in a cohort of 204 children	Maria Carolina Ortube <i>Spain</i>
14:37 - 14:46	FP22	Cortical visual impairment in children: A brief review findings in the Pediatric Ophthalmology Department of Ispahani Islamia Eye Institute & Hospital of Bangladesh	Muhammad Nazmul Haque Kallol <i>Bangladesh</i>
14:46 - 14:55	FP23	Are there clinical predictors of arterial dissections in children with acute ischaemic strokes?	Göran Darius Hildebrand <i>UK</i>
14:55 - 15:04	FP24	Sclerotherapy for orbital lymphatic malformations: visual outcomes and referral patterns	Alex Barnacle <i>UK</i>
15:04 - 15:29	L15	Shaken Baby Syndrome – a little more than just using your ophthalmoscope	Veit Sturm <i>Switzerland</i>

15:30 - 16:00

Poster exhibition/ zvieri (coffee break)

Session 8		Chairpersons: David Taylor and Creig Hoyt	
16:00 - 16:25	L16	The vulnerable infant brain	Creig Hoyt <i>USA</i>
16:25 - 16:50	L17	Visual Rehabilitation in Children with Hemianopia	Susanne Trauzettel- Klosinski <i>Germany</i>

16:50- 17:20

Closing remarks/ Award ceremony
